

SOFTWARE ENGINEER · RIO DE JANEIRO, BRAZIL

João Vitral.

I built the launch pages for **Fiat, Jeep and RAM** that millions of people saw — today I develop the **government systems** that cannot go down.

Software Engineer

aug 2025 — present

Unisys

Large-scale enterprise systems for Prodesp, the IT operator of the São Paulo state government — software that cannot go down and handles sensitive data. ASP.NET MVC, .NET, SQL Server and mainframe integration.

Co-Founder & Tech Lead

may 2023 — jan 2026

Majors Solutions

Led technology and product delivering end-to-end platforms — from design to deploy — for Viert Atelier, Faro Beach Club, Intense Bike Shop and CBL. Next.js, Docker and payments with Stripe.

Software Developer

sep 2022 — aug 2025

dentsu (Digital.Code → Merkle)

Landing pages for nearly the entire Fiat, Jeep and RAM lineups, including the national launch of Fiat's first hybrids (PROX 2.0) and activations such as the Peugeot test-drive experience at CASACOR 2024. Next.js, React and Azure DevOps.

Front-End & DevOps

jan 2021 — aug 2022

igma

Patient app for Hospital Sirio-Libanês in React Native and MRV's Meu Apê; CI/CD pipelines with SonarQube.

Full-Stack Developer (contract)

dec 2020 — apr 2021

WorkInProgress · New York

Harmony Labs, Narrative Observatory and The Grid — interactive, animated experiences for a global audience, built with TDD.

Front-End Developer

nov 2019 — dec 2020

D3 Company

The ZAG corporate reimbursement platform and the digital onboarding for COMGÁS — the journey that lets customers sign up for piped gas 100% online.
